PRESENTS

BHARAT ROBOTICS LEAGUE 2026

THIS SEASON'S THEME:

DANGAL OF ROBOTS

DATE

30TH SEPTEMBER
2026

TIME

9:00 A.M. TO
5:00 P.M.

VENUE

EXHIBITION HALL,
INDIAN MUSEUM,
KOLKATA

EVENTS

ROBO PUSH
ROBO PULL
ROBO WAR

BUILD. BATTLE. CONQUER.

EVENT OVERVIEW

Organised by	FUNSCHOLAR INNOVATIONS PVT. LTD.
Event Name	BHARAT ROBOTICS LEAGUE 2026
Season Theme	DANGAL OF ROBOTS
Event Date	30th September 2026
Time	9:00 A.M. – 5:00 P.M.
Venue	Exhibition Hall, Indian Museum, Kolkata
Tagline	Build. Battle. Conquer.

ELIGIBILITY	HIGHLIGHTS
• Grade 6 and above • Team Size: 2 Participants + 1 Mentor • Multiple teams allowed per school	• 1 Bot • 3 Rounds • Free Participation • Prize per event + Mega Prize • Media Coverage

ROUND 1 — BLOCK PUSH CHALLENGE

Objective: Push wooden blocks out of the arena to score points.

Match Duration: 120 seconds

Block Points Table:

Block Weight	Points
200 gm	10 points
500 gm	20 points
750 gm	30 points
1 kg	40 points
1.5 kg	50 points
2 kg	60 points

ROUND 1

PUSH BLOCK CHALLENGE

PUSH AS MANY BLOCKS OUT OF THE ARENA TO SCORE MAXIMUM POINTS!

🕒 OBJECTIVE

Push the blocks (weights) out of the arena in the given time to score maximum points.

🕒 TIME BASED ROUND

🎲 DIFFERENT WEIGHTS, DIFFERENT POINTS

🎯 HIGHEST POINTS WINS

HOW IT WORKS

- 1 Robot starts from the entry zone.
- 2 Navigate around the arena.
- 3 Push the blocks out of the arena.
- 4 Each block pushed out = Points!

ENTRY ZONE

POWER.
PRECISION.
POINTS!

- Different blocks have different weights — heavier blocks carry higher points.
- Teams attempt to score as many points as possible within the allotted time.
- **Highest cumulative score wins** the round.

ROUND 2 — BLOCK PULL CHALLENGE

Objective: Pull wooden blocks from a designated start zone into the target zone.

Match Duration: 120 seconds

Block Points Table:

Block Weight	Points
200 gm	10 points
500 gm	20 points
750 gm	30 points
1 kg	40 points
1.5 kg	50 points
2 kg	60 points

PULL BLOCK CHALLENGE

ARENA OVERVIEW

Robots pull the blocks using a rope with hooks and deposit them in the target zone.

START ZONE

Multiple wooden boxes (weights) are placed here.

PULL DIRECTION

Robot pulls the box from the start zone towards the target zone.

TARGET ZONE

Boxes must be placed completely inside this zone to score points.

HOW IT WORKS

1 Robot attaches the rope to a box.

2 Robot pulls the box to the target zone.

3 Box must be placed completely inside the target zone to earn points.

ROPE WITH HOOKS (BOTH ENDS)

The robot will use this rope to pull the boxes.

DIMENSIONS (EXAMPLE)

- Blocks are tied with ropes having hooks at the other end.
- Every robot must have a hook hole (diameter: 10 mm) in the back-center of the chassis, as specified in the Robot Technical Specifications given below.
- Hooks are manually placed by participants at the start of each attempt.
- Teams score as many points as possible within the allotted time.
- **Highest cumulative score wins** the round.

Note: For wired robots, the hook hole must be on the same side from which the wire exits.

ROUND 3 — ROBOT WAR

Objective: Push the opponent's robot completely out of the arena within 60 seconds.

Match Duration: 60 seconds

Scoring — Points = Remaining Time × 3 (faster victories earn higher points):

Win Time	Points Awarded (Remaining Time × 3)
Win in 10 seconds	$(60-10) \times 3 = 150$ points
Win in 20 seconds	$(60-20) \times 3 = 120$ points
Win in 35 seconds	$(60-35) \times 3 = 75$ points
Win in 50 seconds	$(60-50) \times 3 = 30$ points
Tie (no winner in 60s)	$20 \times 3 = 60$ points each

ROUND 3 ROBO WAR

ONE ARENA. ONE WINNER.

Push your opponent out of the arena to win!

ARENA OVERVIEW

- Circular arena
- No walls or fencing
- Flat flex surface
- Two bots enter, one winner exits!

HOW IT WORKS

- 1 Both robots enter the arena.
- 2 Push your opponent out of the arena.
- 3 The last robot remaining in the arena wins!

RULES AT A GLANCE

No intentional damage to the arena.

Weight limit as per official guidelines.

Follow all safety and fair play rules.

Match duration as per official schedule.

ARENA SIZE

Diameter: 3.0 meters

- Two robots enter the arena — the last robot remaining inside wins.
- Circular arena with no walls or fencing. Flat flex surface. Diameter: 3.0 metres.
- Formula: Points = $(60 - \text{Win Time in seconds}) \times 3$. Example: win at 20s $\rightarrow (60 - 20) \times 3 = 120$ points.
- In case of a tie, both teams receive $20 \times 3 = 60$ points each.

AWARDS STRUCTURE

Award	Criteria
Champion – Block Push Challenge	Highest score in Round 1
Champion – Block Pull Challenge	Highest score in Round 2
Champion – Robot War	Highest score in Round 3
The Ultimate Title BHARAT ROBOTICS LEAGUE GRAND CHAMPION	Highest cumulative score across all 3 rounds

ROBOT SIZE, WEIGHT & CONTROL SPECIFICATIONS

Rule	Allowed Limit
Maximum Weight	3.5 kg
Robot Length	30 cm Maximum
Robot Width	25 cm Maximum
Robot Height	25 cm Maximum (from ground)
Hook Hole Diameter	10 mm
Hook Hole Location	Center of front or back of chassis
Power Limit	12 Volts Maximum

- Control: Wireless or wired — team's choice.
- Wired setup: Wires must be long enough for the robot to move freely across the full track.

TECHNICAL SPECIFICATION: PULL BLOCK CHALLENGE REQUIRED CHASSIS MODIFICATION

REQUIRED BACK HOLE: 10mm
(Demonstrated Diameter)

**PARTICIPANTS MUST
CREATE A 10mm HOLE
AT THE BACK OF THE
CHASSIS.**

**BRING THE CHASSIS
WITH THIS HOLE TO
THE COMPETITION.
DO NOT ATTACH ANY HOOK.**

Note: For wired robots, the hook hole must be on the same side from which the wire exits.

DETAIL VIEW:

Organizer's Hook Placement
(Organizers supply hooks during event)

Teams provide chassis with hole.
Hooks will be provided by the organizers during the event.*

■ MANDATORY MATCH RULE

Every team must use the **exact same robot** for all three rounds. You cannot change the main body, swap parts, or switch to a different robot between rounds. Your single robot must be built to handle pushing, pulling, and fighting.

GENERAL GUIDELINES

1. Participants must design, build, and assemble their robots themselves. Ready-made commercial robots are not allowed.
 2. All robots must remain within the specified dimension and weight limits throughout the entire competition.
 3. The use of fire, flames, explosives, smoke-generating devices, corrosive substances, hazardous chemicals, or any dangerous materials is strictly prohibited.
 4. Sharp weapons, blades, spikes, projectiles, firearms, or any component that may cause injury to participants, spectators, officials, or equipment are not allowed.
 5. Teams must fully prepare, assemble, programme, and test their robots at their own place before entering the competition arena.
 6. No major repairs, assembly work, or modifications will be permitted inside the competition arena unless approved by the organizers.
 7. Teams must report to the competition venue before their scheduled event time. Late arrivals may result in disqualification.
 8. Participants must maintain sportsmanship and fair play throughout the competition.
 9. Any form of cheating, intentional interference, or unsportsmanlike conduct will result in penalties or disqualification.
 10. Participants are responsible for the safety and proper operation of their robots.
 11. Robots must not intentionally damage the competition arena, track, equipment, or surrounding infrastructure.
 12. Judges and event officials reserve the right to inspect any robot before or during the competition.
 13. In case of disputes, the decision of the judges and organizers shall be final and binding.
 14. Every team must bring additional rechargeable batteries to the event.
 15. Organizers reserve the right to modify or update rules if required to ensure safety, fairness, and smooth conduct of the event.
